Métis Graph Visualization Standards Summary

Graph behavior and export guidance for the finalized visual system.

Graph Philosophy

Graphs represent intelligence discovery, relationship mapping, and analytical classification. Confirmed focal entities should resolve to the Wisdom Gold layer. Signal colors classify analytical meaning and remain subordinate to authority gold emphasis.

Role	Color Meaning
Confirmed intelligence / primary focal entity	Wisdom Gold (#D4A73A)
Anomaly detection	Magenta Pulse (#FF2D8F)
Financial activity	Solar Orange (#FF7A18)
Relationship strength	Signal Yellow (#FFD400)
Digital communications	Cyber Teal (#32D1CC)
Emerging patterns	Neon Lime (#A6FF00)

Application and Report Use

The graph system must support live investigation use, clear inspector synchronization, and readable exports for both digital and print-friendly reporting modes.
